Ahmet Yiğit Canlı

Software Developer

PROFESSIONAL SUMMARY

Second-year Management Information Systems student with over five years of hands-on project experience. Skilled in frontend (React, Tailwind CSS, Vite) and Python development, and highly proficient in leveraging generative AI code agents (GitHub Copilot, Claude, ChatGPT) to accelerate workflows. Proven ability to design, deliver, and actively diagnose, debug, and refactor AI-generated code for concept websites and automation solutions. Motivated and passionate about building efficient, user-friendly digital products.

PROFESSIONAL EXPERIENCE

Freelance Fullstack Web Developer (Jan - March 2025)

- Engineered a full-stack consultancy website, utilizing AI code agents (e.g., Copilot, Claude) to accelerate the development and implementation of custom UI/UX features.

Frontend Freelance Developer (Jan 2024 - Jan 2025)

- Delivered 10+ custom web projects by integrating generative AI tools into the workflow, significantly reducing development time while actively diagnosing and debugging AI-generated code.

Web And Software Developer (Jan 2021 - Jan 2022)

- Designed and implemented front-end components using React.js and Node.js, leveraging AI assistants for rapid code generation and refactoring to optimize UI/UX design.

- Collaborated with cross-functional teams to optimize UI/UX design and ensure responsive, mobile-friendly solutions.
